## HOW TO USE THE BUNSHAH INDEX

**A. Technical Information – This is an Index only. The full text of the articles is retrievable through microfilm copies of the newspapers. These are available at the Livermore Public Library.**

- 1. Adobe Acrobat Reader is required to view the compact disc.**
- 2. Compact Disc is readable by all types of computers**

**B. Search Options:**

- 1. Select either subject or date on the opening screen**
  - a. Subject entries are listed by date within the Index**
  - b. Date entries include subjects as a parenthetical comment for example: <SCHOOLS>**
- 2. Within the index use the Find function of Adobe Acrobat from either the Tools menu or by selecting the binocular icon.**

**C. Description of entries:**

**1. Entries by subject:**

**Newspaper Name Date Section Page number Column Headline**

**HE. JUL 08 1899: .2. Midnight blaze: barn belonging to N. D. Dutcher destroyed**

**This article would be found in the Livermore Herald for July 8, 1899 on page two.**

**2. Entries by Date:**

**Newspaper Name Date Section Page number Column Headline  
<SUBJECT HEADING>**

**HE. JUL 08 1899 .2 Midnight blaze: barn belonging to N. D. Dutcher destroyed <FIRE DEPTS AND FIRES>**

**3. Entry Structure**

- a. The newspaper abbreviations do not reflect all variations in their titles over the years.**

**HE = Livermore Herald, Herald and News, Tri-Valley Herald**

- b. Headlines are exactly as they appear in the newspapers in order to maintain historical integrity. Cryptic headlines have been explained by Mrs. Bunshah with parenthetical remarks.**

**Ex. Gas Explosion Burns (Hetch Hetchy worker)**

- c. Dates are entered in month day and year format. Months have three letter abbreviations without a period, days have two digits, years have four digits**

**Ex. Apr 03 1899**

**PLEASE NOTE that the early newspapers were published only once a week, later ones three times a week. Therefore, Index dates reflect when the newspaper was published not when the event happened.**

**D. Search Approaches – open Find window in all cases**

- 1. Personal Names – Use the last name only**

**Headlines frequently abbreviate first names with James becoming Jas, or J or William becoming Wm or Will.**

**Type the entry with capital letter where appropriate. For example: Alviso, select the “Match case” button.**

- 2. Finding a date within a subject**

**You MUST use Index standard format, for example: Apr 29 1919**

**PLEASE NOTE that the early newspapers were published only once a week, and later on three times per week. Therefore, the dates referenced in the Index reflect when the newspaper was published, not when the event happened. Searching for exact dates of events is somewhat perilous.**

- 3. Finding a subject within a date**

**Type the subject in CAPITAL LETTERS**

**Select the “Match Case” button**

**Subject searches go awry if the word chosen are not Bunshah Index subjects. Consider shortening your selection if you get no matches. For example: instead of CARNEGIE BRICK WORKS select CARNEGIE**

**“The Local History On-Line Project” digitally preserves a unique Index. The project is supported by federal Library Services and Technology Act funding administered by the California State Library.”**

**Mrs. Barbara Bunshah holds the copyright to the Index, and this Index may not be reproduced without permission.**
